

## NewSlides User Manual

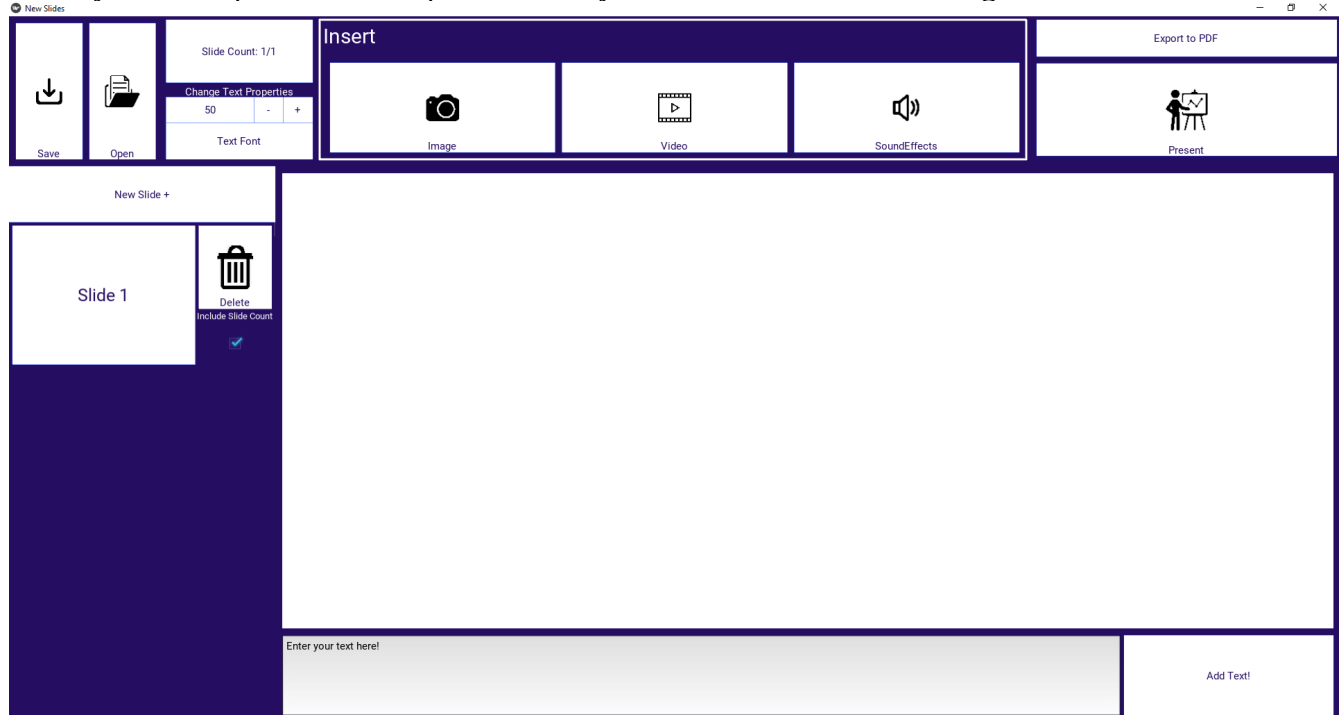

### Welcome Screen

When you open the program, you will be greeted by this screen. Click on the button labeled New. This will take you to the editing screen, where you will be able to start a new presentation. If you have an saved presentation that you would like to be able to open, clicking on New will take you to the editing screen where you can do that.

## Editing Screen

When you have opened the new presentation, you will be taken to the editing screen, which is this.

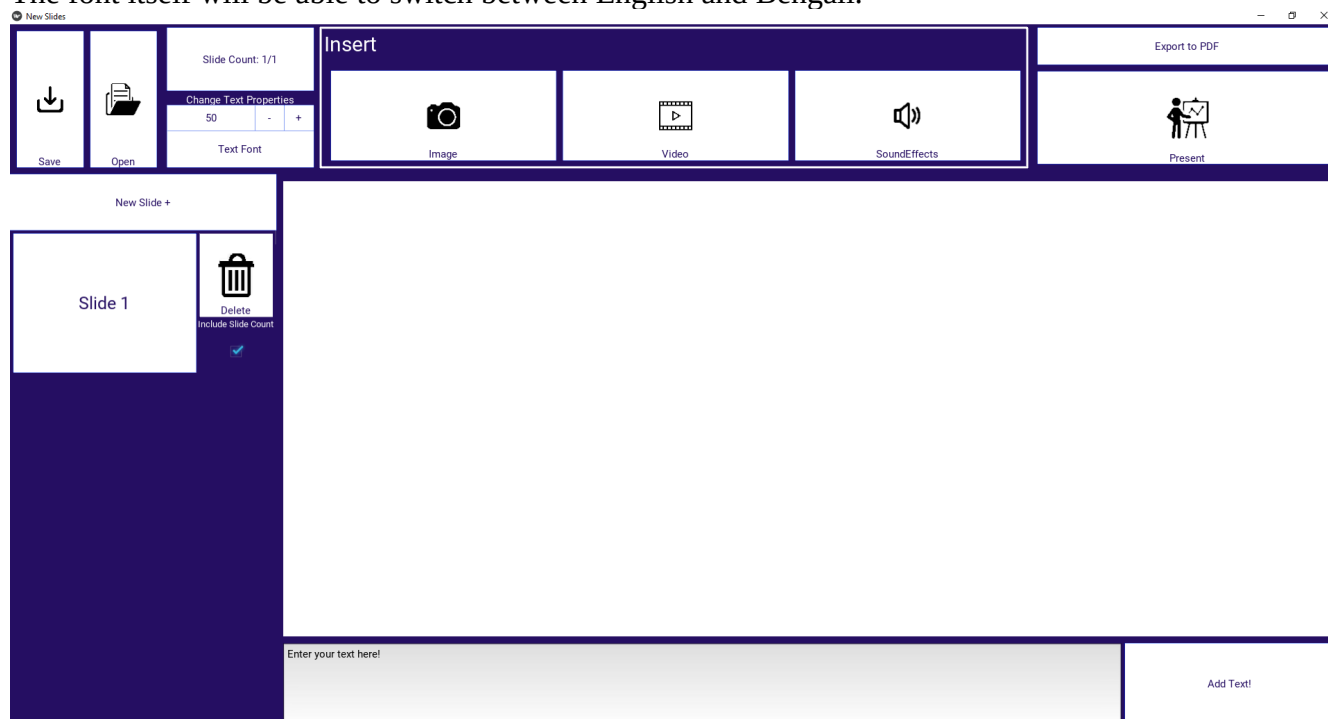

Clicking on the New Slide button will create a new, blank slide to be edited, which will appear beneath the New Slide button, as shown below.

The Delete button next to the new slide will delete it, and the Include Slide Count box will toggle whether it is counted in the overall slide count, shown at the top left of the editing screen. Above the New Slide button, the Save button will save the slides as PNG files that can be opened and worked on later. Next to the Save button, the Open button can open previously saved presentations.

from the editing screen. Next to the Open button, below the slide counter, the font size can be changed. The font itself will be able to switch between English and Bengali.

At the bottom of the screen, there is an area to add text, and a button to add your chosen text to the slide. Once on the slide, it can be dragged around and placed wherever.

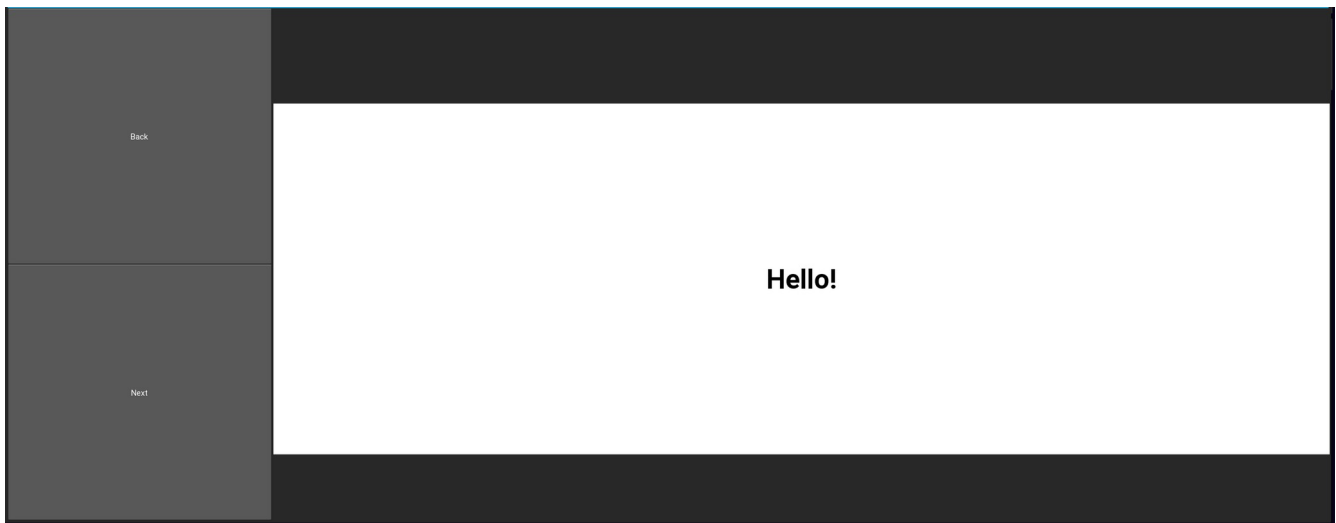

In the middle of the top part of the screen, the Insert section has buttons for adding media to your presentation. You can choose images, videos, or sound files to add from files already stored on your computer. Once media has been added to your slide, you can left click it to drag it around and reposition it. Right-clicking on the media will create a red circle, right-clicking again will create another circle that will allow it to be dragged to resize or rotate the image.

On the top right, there is the Present button and the Export to PDF button. The Export button will save the slides as a PDF file. The Present button will take the user to the Presentation screen.

## Presentation Screen

The presentation screen has the first slide in your presentation, and two buttons to the left for navigating between your slides. The Next button will take you to the next slide in your presentation, and the Back button will take you to the previous slide in your presentation.
